## **Human Wikipedia**

January 18th, 2019 - In common usage the word human generally refers to the only extant species of the genus *Homo*—anatomically and behaviorally modern *Homo sapiens*. In scientific terms the meanings of hominid and hominin have changed during the recent decades with advances in the discovery and study of the fossil ancestors of modern humans. The previously clear boundary between humans and apes has

## **Race and intelligence Wikipedia**

January 19th, 2019 - The connection between race and intelligence has been a subject of debate in both popular science and academic research since the inception of IQ testing in the early 20th century. There remains some debate as to whether and to what extent differences in intelligence test scores reflect environmental factors as opposed to genetic ones as well as to the definitions of what race and
