Plasma physics Wikipedia

January 14th, 2019 - In astrophysical plasmas Debye screening prevents
electric fields from directly affecting the plasma over large distances if
the Debye length is greater than the Debye length. However, the existence of charged
particles causes the plasma to generate and be affected by magnetic fields.

Woltjer's theorem Wikipedia

January 6th, 2019 - In plasma physics, Woltjer's theorem states that force
free magnetic fields for a closed system with constant helicity have the minimum
magnetic energy and the magnetic helicity is invariant under this

condition named after Lodewijk Woltjer who derived in 1958 The force free field strength equation is $\hat{n} \cdot \nabla = 0$ The helicity invariant is given by $\int \mathbf{A} \cdot \mathbf{j}$ where \mathbf{A} is related to $\hat{n} \cdot \nabla = 0$ through the vector
